

A blue-tinted photograph of a port or shipping yard. In the foreground, a worker in a high-visibility vest and hard hat stands near a container. The background shows stacks of shipping containers, some with labels like 'MAERSK' and 'TARE: 11,71 SWL: 1000'. A large, semi-transparent steering wheel graphic is overlaid on the right side of the image. The steering wheel has the word 'CARGO' written across it and several stars. The overall scene is illuminated by a bright light source, creating a lens flare effect.

LASHING CERTIFICATE

WE ARE CARGO SAFETY

An entrepreneurial profile company, always looking forward to innovation. Cargo Safety is developed with human resources. We count on employees motivated by the company, who cares about the quality and expertise of the business, which reflects in a final delivery with high quality, are focused always on safety, and of course, complying always with the highest standards of quality.

Technical inspections of containers, an inspection of cargoes, lashing, heavy lifts, breakbulk, Port captain/Supercargo services, and special projects. We follow all technical criteria and qualities requirements practiced by the Market, always within the international standard of work safety, security norms, and endorsement of the Commissioner of Damages (FUNENSEG / FUNSEG).

Sailing will be always accurate. It is up to us to guarantee the safest means of crossing your cargo across the seven seas.

SPECIALIST IN LASHING CERTIFICATE

Lashing Certificate is a document issued by an independent company and recognized by competent Organs which grants that the project cargo follows all the technical standards and requirements required by current legislation related to cargo securing for maritime transport. At Cargo Safety, all reports are issued by a qualified engineer with extensive experience in the subject.

Our Surveyor attests to the strength of materials, their weight distribution, conditions of load unit support, condition of cables, tapes, chains, hardware, and package dimensions.

Our Surveyor attests to the strength of materials, their weight distribution, conditions of load unit support, condition of cables, tapes, chains, hardware, and package dimensions.

We are also affiliated with the National Federation of General Insurance - FENSEG, which guarantees the quality and full coverage of the operation.
