FOCUSED ON WIND PROJECTS**

WE ARE CARGO SAFETY

An entrepreneurial profile company, always looking forward to innovation. Cargo Safety is developed with human resources. We count on employees motivated by the company, who cares about the quality and expertise of the business, which reflects in a final delivery with high quality, are focused always on safety, and of course, complying always with the highest standards of quality.

Technical inspections of containers, an inspection of cargoes, lashing, heavy lifts, breakbulk, Port captain/Supercargo services, and special projects. We follow all technical criteria and qualities requirements practiced by the Market, always within the international standard of work safety, security norms, and endorsement of the Commissioner of Damages (FUNENSEG / FUNSEG).

Sailing will be always accurate. It is up to us to guarantee the safest means of crossing your cargo across the seven seas.

SAFE LOGISTICS

The global market focused on wind energy keeps growing by more than 10% a year. This information was given by the Global Wind Energy Council. It means that at least 10k new wind towers must be placed around the world in the next 20 years. Nowadays, the size of a wind blade can be 100 meters or more, weighing tons. Such dimensions many times exceed the limits of roads, which makes the logistics more complex and challenging.

Cargo Safety has been present in many mega operations involving shifting of wind projects, supervising the loading and discharging of molds, towers, tramos, hubs, nacelles, and drivetrains. Each piece of equipment weighs around 22 tons. Our experts act in the technical evaluation of the shifting, and lashing of the volumes once discharged / loaded, issuing specific reports which guarantee the insurance interests arranged in the logistical process.

NOSSOS CLIENTES

ARMADORES

-Maersk
-Hapag Lloyd
-MSC
-BBC
-Intermarine

AGENTES DE CARGA

-DHL
-DSV
-DEUGRO
-DB
-SCHENKER
